The First Name in Protective Mailers

All Jiffy® Mailer products are produced in world class manufacturing facilities to exacting quality standards. They offer the most comprehensive range of cushioned, non-cushioned and rigid protective mailers in the market and accommodate the widest possible range of applications.

Why Use Protective Mailers?

A Cost-Effective Alternative to Corrugated Cartons.

Improved customer satisfaction

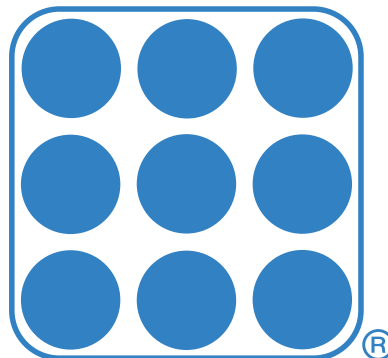

Mailers provide superior product protection with no waste, mess or loss of small items.

Environmentally responsive

Jiffy® products have a high recycled content & help reduce solid waste through source reduction.

Increased productivity

Simply slide your product into the mailer and seal.

Easy to order

All Jiffy® Mailer products are available for immediate supply.

Reduced labour costs

Fewer packing steps required.

Aesthetically appealing

The premium appearance enhances your company image.

Reduced space requirements

Mailers store flat and eliminate the need for additional void fill.

Reduced mailing and material costs

Cheaper postage than heavier corrugated cartons. No need for void-fill and tape reduces material costs.

Around the world Sealed Air manufacture and market a wide variety of packaging materials and systems to protect products from damage caused by shock, vibration and abrasion.

Sealed Air has more than 40 manufacturing locations. Our wealth and depth of technical expertise is freely available to all our customers.

Our products are supported by:

- Consultative sales and technical staff to work with you to determine the most cost-effective packaging solutions.
- Package evaluation, design and testing.
- Training to ensure your personnel are using our products effectively and economically.
- Worldwide availability for customers with multi-national requirements.

Our products protect the environment

Sealed Air is committed to manufacturing products that adopt the following lines of action:

1. **Source Reduction** - we are continually striving to reduce the amount of packaging material needed to ensure adequate product protection.
2. **Reuse** - All protective products are designed for maximum reuse.
3. **Recycling** - Use of recycled materials as well as the internal recycling of waste and participation in kerbside collection and recycling centre programmes.
