PriorityPak[®]

Automated Packaging Systems

A High-Speed System Solution That Encapsulates Products In A Ready-To-Ship Protective Package

PriorityPak® Automated Packaging Systems

Versatile Cold Seal® Cohesive Packaging Enhances Productivity

Dramatically Increase Productivity

Depending upon product length, the PriorityPak® system can create up to 20 packages a minute, compared to only 1-3 packages a minute by manual methods. This shortens the packaging process and maximizes your use of labor.

Determine The PriorityPak® System That Suits Your Packaging Line

PriorityPak® System With Manual Label Configuration

Simply place the product on the bottom material web, apply the mailing label to the top web, and push a button to create a package.

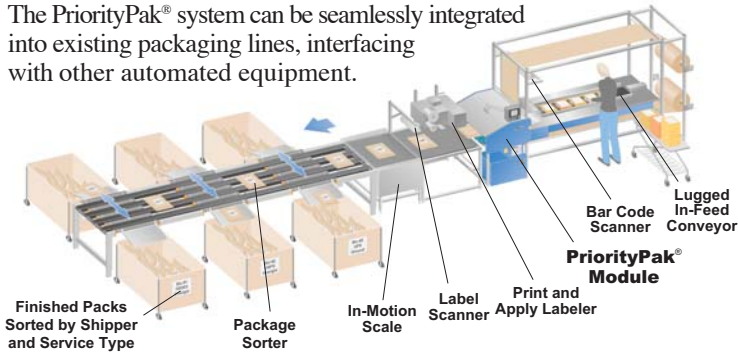

PriorityPak® System With Enhanced Functionality

Maximize productivity by expanding system capabilities, such as an integrated scale, scanner and labeling components.

Customize A System For Your Operation

The PriorityPak® system can be seamlessly integrated into existing packaging lines, interfacing with other automated equipment.

Local Service Support

Our highly-trained support staff is ready to provide service and assistance for all your technical requirements.

The Integrity of Cold Seal® Cohesive Packaging

The PriorityPak® system encapsulates your products in a Cold Seal® cohesive-coated protective package that locks and seals products in place to minimize shifting; providing superior product protection from the rigors of shipping and handling.

Choose The Right Material For Your Application

PriorityWrap® Bubble Laminate

PriorityWrap® Bubble Laminate provides strong, yet lightweight, protection. It is best for odd-shaped items or products in need of maximum cushioning and surface protection, like cosmetics, pharmaceuticals, CDs and DVDs.

PriorityWrap® Rigid Board utilizes our patented XRS Roller System creating a crescent seal that suspends the product, minimizing product shifting and providing additional corner protection. Ideal for flat, evenly shaped items, like books and calendars.

PriorityWrap® Rigid Board

PriorityWrap® Film/Paper Laminate

PriorityWrap® Film/Paper Laminate provides a durable co-extruded film layer on the outside, and a tough kraft layer on the interior, making it perfect for lightweight products and soft goods.

Consult Your Sealed Air Representative Today

Let our automated system specialists help you select the right material and design a system that fits your needs.

Specifications			
System: Electrical: 115 VAC, 60 Hz, 15 Amp Air: Up to 14 cfm @ 100 psi			
Material	Width	Linear Feet	Diameter
PriorityWrap® Bubble Laminate	8", 9.5", 12"	500ft	27"
	16" or 18"	850ft	36"
